

Prof. A.S. Southward. Nov. 10/99.

I am glad too in to get notice from you! I think that you are my best and old "friend" online! I am retired but I continue working at the laboratory in Anatomy and histology of Barmacks. But, here Oswaldo Cruz Institute don't like Barmacks, and now I work <sup>here</sup> without money. It is a pit, but I continue to love Barmacks. Some time I do research in Triatoma (Vector Chagas Disease), to do evocative cycle the Trypano some cruzi inside the haemolymph, Salivary glands anatomy and histology, but I want, I love, is Barmacks. During my collected Euryphora rhyzophorae I find with help histological methods the beautiful "gregarina" - Cephalodiphora communis" living in digest apparatus of E. rhyzophora. It is wonderful!!!

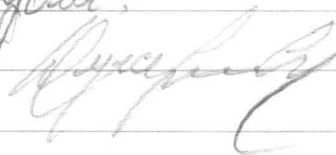

~~Miss~~ I send<sup>it</sup> to my best friend  
mine Dr. Sophie Yakowska, D. from  
Santo Domingo, Republica Dominicana.  
She look<sup>s</sup> to do criticism and so  
later write me about. Do you know  
Dr. Sophie Yakowska? ~~She~~ is wonderfull  
person, very inteligent and humana.  
Some time, I fly to Sophie House and  
stay there, where I learn many things.  
Next year, I have plane in to go to  
S. Domingo, <sup>Sophie house</sup> collected barnacles in "Haitizes"  
and another place, perhaps in wales. I  
would like to know about cement <sup>islands</sup> ~~islands~~  
~~the epistome~~ of <sup>in</sup> ~~the~~ wales, and collected  
*Cylix<sup>on</sup> holopas* *raichianeti* or similar.

Thank you very nice for send me  
a Xerox copy of the article on cirral  
activity. My acknowledge to your wife  
Dr EVE.

My E. mail is : dlacombe@pcshop.com

br

Sincerely yours,

o
