Rio de Janeiro BRAZIL

Dear Dr. Travossos:

I am a specialist of Saturniidae and am familiar with some of your fine work on species in this family. If you have still available any reprints (separates) of some of your papers on Adelocephalinae I should very much like to receive them, autographed.

Presently I am working on a revision of the genus Anisota with Rev. J. C. E. Riotte and we expect to publish in about two more years. We are interested in your work with the related genera in Brazil. I am also familiar with the works of the late Jose Oiticica-Filho and I have many of his papers which I purchased from a book dealer in Holland. I bought a Portuguese-English dictionary to facilitate reading these works.

I note in the Lep. Society Membership List that you might be interested in exchanging Arctiidae and Adelocephalinae. I have material of Anisota and Sphingicampa and can collect Arctiidae from Texas and South Carolina for you if you desire an exchange.

It would be a special pleasure to hear from you.

Kindest regards,

Richard S. Peigler
