Dear Dra. Noronha:

Thank you for your kind letter of 18 May. I am sorry to learn that Prof. Travassos is dead. I had thought that this was true but then I had seen his name in the 1976 membership list of the Lepidopterists' Society.

I am very pleased to have the collection of reprints which you have so kindly sent to me. At present I am conducting no particular research or revisions on any South American species but I think that these will be useful in future years. I collect all literature on Saturniidae.

Best of luck in your work with Acanthocephala.

Best wishes,

Richard S. Peigler
